MSI-vB Engine Guide

I. Prerequisites

- ✓ BBPixel Core Engine 1.x
- ✓ vBulletin 4.0.x
- ✓ PHP 4.1.x or later
- ✓ Mysql 4.1.x or later

II. Clean new installation

A. Copy Files

1. Rename "\upload\vbulletin\msicore\config.php-dist" to "config.php"

2. Edit "config.php" above and fill in All necessary settings value via comment instructions.
   Note: this config.php file is the same with the one of MSI Core Engine, you can take a copy from MSI Core Engine and put it here.

3. Copy all files + folders inside "\upload\vbulletin" to vBulletin root path, ex: yoursite.com/vb. This step may be overwritten some vBulletin core files but it is fine.

4. Copy all files + folders inside "\upload\msi" to MSI core root path, ex: yoursite.com/msi.

B. MSI :: plug-in

- Point browser to "yoursite.com/vb/msicore/install.php" and do as its instruction.

Note:

1. You **Must Backup your vBulletin + MSI database** first.

2. This installer script can be only run at once. Remember to delete this installer file for your own security.

C. Synchronize Users

- Login to MSI Core Engine -> Synchronize -> Status
- Click Synchronize icon of Core Plug-in first, then to vBulletin Plug-in

Note: If there is duplicate record Error occurred, clicking on Fixes icon of vBulletin Plug-in and try again.
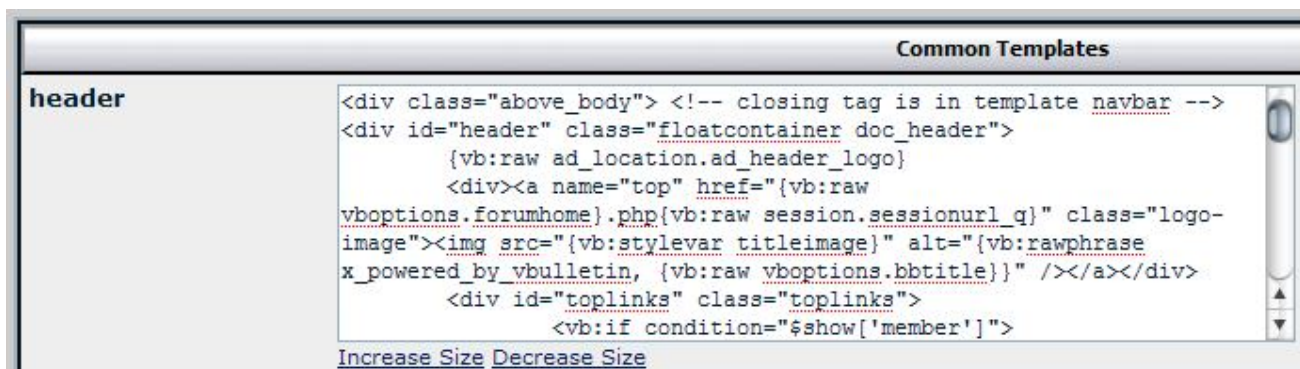

D. Ajax form customizing

1. Making login/register form

- Login to vBulletin Admin CP -> Style Manager -> Select Current Template Set :: Edit
header template

Find and Remove following code:
```
<ul class="nouser">
…
…
</ul>
```

Then, replace with new login code:

```
<div>
<a href="http://yoursite.com/msi/remote.php?act=login&amp;redirect=http://yousite.com" onclick="return GB_show('Login System',
this.href, 330, 500, '')"> {vb:rawphrase log_in}</a>
<a href="http://yoursite.com/msi/remote.php?act=reg&amp;redirect=http://yoursite.com" onclick="return GB_show('Register System',
this.href, 430, 500, '')">{vb:rawphrase register}</a>
</div>
```

Note: You must change "yoursite.com/msi" URL to properly URL of your current MSI location.

III. Upgrading

- Do like Section II -> A -> 3 + 4 above

IV. Note

- MSI engine now will control User registration, userCP and User Management. So you will need to take note to use MSI engine instead of the one of vBulletin.
