More info at: <http://www.vtem.net>

# Terms of Use

All the materials and/or graphics contained in the VTEM template folders **MUST** be used **ONLY** with the VT\_Wedding Template from Vtem.net

**Note:** All the K2 extensions of 3rd party and their peripherals will not be included in the QuickStart package. You will need to download and install separately.

## Introductions

These instructions are for installing the template and its associated extensions, with or without the QuickStart package.

The QuickStart package is very helpful and enables you to setup the template exactly as it is on the demo. If you already have a running Joomla! website, you should not use the QuickStart package.

The setup instructions for installing with and without the QuickStart package are shown below. The VT\_Wedding All in One package (VT\_Wedding\_UnzipFirst\_XXXXX.zip) contains the following files.

Note that the files of this package should be extracted first on your computer.

1. VT\_Wedding\_Template\_v1.0\_j25.zip
2. mod\_vtem\_imageshow.zip
3. mod\_vtem\_flybox\_v1.0\_j25.zip
4. VT\_Wedding\_QuickStart\_v1.0\_j25.zip
5. installation\_guide.pdf

From the list above you will note that for this Joomla template there are available the template, 3 extensions, QuickStart package which can make your website exactly as our demo and the Installation

Guide which in fact is this document that you are viewing.

All the files above from number 1 to 3 should be installed through the default Joomla! Installation process in Joomla! Administrator.

## With the QuickStart

If you plan to use the “QuickStart” package all you have to do is to upload the content of “QuickStart\_x.x.x” on your desired directory and begin the default installation process as described by Joomla!

Note that **you must install the “sample data” on the 6th step of the installation process** so that your database should be updated with our template data. Also if you make use of the QuickStart package, all files from 1-3, that are found inside the All in One package, should not be used as they are by default on the QuickStart package, so you don't have to install anything from the Joomla! Installation page in Joomla! Administrator, after you have completed the installation process.

The QuickStart package will save you a lot of times as you don't have to set parameters for the extensions and for our template plus you have the content set up by default. So making use of this package is extremely recommended for websites that begin from scratch.

# Without the QuickStart package

## Note:

The instructions below assume that you have first successfully installed Joomla on your server. For more information on how to install Joomla please follow the [Joomla QuickStart](#) page

- 1) Extract the content of the VT\_Wedding\_UnzipFirst on your computer.
- 2) Install VT\_Wedding\_Template\_V1.x.x.zip from Joomla Administrator – Install/Uninstall
- 3) Install in the same way the following extensions which are on the package.
  - a. mod\_vtem\_imageshow.zip
  - b. mod\_vtem\_flybox\_v1.0\_j25.zip

After you have successfully installed all the above files on your Joomla! Website you need to edit for each extension and for the template their parameters. You may view the default parameters from the guide below, but you may change them with your desired ones.

### c. HTML Module (Social With Us, Support Center)

The screenshot shows the Joomla! editor interface. The 'Text' tab is active, and the 'HTML' button in the toolbar is highlighted with a red box. The main text area contains the text 'Social With Us:' followed by a bulleted list. Below the text area, the 'Path' is shown as 'div » div.draw\_content » div.title'. The 'Menu Assignment' section is visible, showing 'Module Assignment' as 'On all pages' and 'Menu Selection' as 'About Joomla', 'Australian Parks', 'Fruit Shop', and 'Main'. An 'HTML Source Editor' window is open, displaying the following HTML code:

```
<div id="vt_drawer">
<div class="draw_content">
<div class="title">Social With Us:</div>
<ul>
<li><a class="sprite facebook" href="#" title="facebook">
</a></li>
<li><a class="sprite twitter" href="#" title="twitter"> </a></li>
<li><a class="sprite rss" href="#" title="rss"> </a></li>
<li><a class="sprite in" href="#" title="in"> </a></li>
<li><a class="sprite google" href="#" title="google"> </a></li>
</ul>
</div>
</div>
```

The 'Update' button is highlighted with a green box, and the 'Cancel' button is highlighted with a red box.

The screenshot shows the Joomla! editor interface. The 'Text' tab is active, and the 'HTML' button in the toolbar is highlighted with a red box. The main text area contains the text 'Lorem ipsum dolor sit amet, consectetur adipiscing elit. risus pretium scelerisque.' followed by contact information: 'Tel: (+844) 9998888', 'Fax: (+844) 9998888', 'Email: contact@vtem.net', and 'Website: www.vtem.net'. Below the text area, the 'Path' is shown as 'p'. The 'Menu Assignment' section is visible, showing 'Module Assignment' as 'On all pages' and 'Menu Selection' as 'About Joomla', 'Australian Parks', 'Fruit Shop', and 'Main'. An 'HTML Source Editor' window is open, displaying the following HTML code:

```
<p>Lorem ipsum dolor sit amet, consectetur adipiscing elit. Mauris molestie elit lacus, molestie tempor odio. Vivamus in lacus eu risus pretium scelerisque.
<br /><br />Tel: (+844) 9998888<br />Fax: (+844) 9998888<br />Email: contact@vtem.net<br />Website: www.vtem.net</p>
```

The 'Update' button is highlighted with a green box, and the 'Cancel' button is highlighted with a red box.
